

More HDC Research

Look of Life Study

- *This study looks at the earliest precursors of the skill for understanding the actions of other people.*

Understanding Emotions

- *How do individuals perceive emotional information from faces? How those with autism may differ in their perceptions.*

Pregnancy and Cognition

- *We want to know how pregnancy affects the way women think.*

Infant Directed Motion

- *Do parents modify their actions to their babies' understanding in the same way that they modify their speech?*

.....and many others.

People in the Study

Director

Dr. Mel Rutherford

Researcher

Kristen Krysko

Manager

Brenda Johanson

And our many participants...

McMaster University
Human Development Centre
Psychology Building
1280 Main Street W
Hamilton, ON
L8S 4K1
